AFTECH Speeds Forward with Automotive Federal Credit Union Business

Malvern, Pa., April 16, 2007 -- AFTECH, a business unit of Fiserv, Inc. (NASDAQ: FISV), one of the largest providers of information technology to the financial services industry, announced today that Automotive Federal Credit Union based in Ypsilanti, Mich., has chosen AFTECH's Advantage in-house core processing solution. The \$60 million dollar credit union converted to Advantage April 1.

Automotive Federal Credit Union will now offer the full range of Advantage member service products, credit and debit card processing, the Wisdom suite of financial products, and several Integrated Media Management products -- including TotaleReceipts -- all backed up by AFTECH disaster recovery.

"We knew from the outset what features we wanted in a new core data processing system, and the AFTECH Advantage system brought our credit union the features and benefits that we were looking for. I also knew from AFTECH's utilization by other Michigan credit unions that we would have the support of other local credit unions using the system," said John Hoblack, Automotive Federal Credit Union's chief executive officer.

Hoblack explained that three factors drove the decision to change to AFTECH's Advantage; references from other credit unions, the wide range of features offered in Advantage, and the 24/7 system availability with minimal or no downtime for end-of-day processing.

AFTECH president Joe Antellocy, welcomed Automotive to AFTECH's client base in Michigan, commenting, "We are happy and proud to add Automotive to our list of clients, and especially pleased that references from current clients played significantly in Automotives decision."

About Fiserv, Inc.
